    - Source Code: occupies full repository
      - Repo organization described in README.md
    - Test Cases: In directory test/
      - Uses PyUnit. If everything is being run correctly on a local server, the command line in order to run these cases is:
        - python3 manage.py test
      - Must be in directory: Bracket-Boys/brackets/
